SUMMARY

Frontend Software Engineer with 1+ year of professional experience delivering full-stack SaaS platforms, AI-powered tools, and high-performance UIs across 5+ production projects. Specializes in scalable React/Next.js architecture, performance optimization, and integrating AI/cloud-native services including RAG pipelines and Cloudflare edge computing.

EXPERIENCE

Frontend Developer · Xpertspot IT Solutions, Pakistan

2025 – Present

- Engineered and maintained 5+ client-facing web applications using React.js, TypeScript, and TailwindCSS, ensuring consistent performance across all projects.
- Reduced UI bug backlog by ~40% by collaborating daily with backend developers to ship new features and resolve cross-stack issues on client websites.
- Established a reusable component library adopted by a team of 4 developers across 8 projects, cutting per-feature development time by ~30%.

PROJECTS & INDEPENDENT WORK

Doaba Sports · doaba-sports.vercel.app

2025 – Present

Next.js 16, TypeScript, Redis, PostgreSQL

- Built a full-stack eCommerce platform with secure JWT authentication, Redis caching that reduced API response times by ~60%, and rate limiting to protect against abuse.
- Engineered an Admin Dashboard supporting 500+ product SKUs with real-time inventory management, order tracking, and role-based access control.
- Optimized rendering with Next.js 16 server components and lazy loading, achieving sub-2s load times under high-traffic conditions.

AI Design Tool · ai-design-tool.sufyaanshahid8.workers.dev

2026 – Present

Next.js, TypeScript, Upstash Vector, Cloudflare Agents SDK

- Built an AI-powered tool that converts natural language into architecture diagrams, eliminating manual diagramming for technical teams.
- Implemented RAG architecture using Upstash Vector for semantic search and embeddings, improving diagram accuracy by grounding outputs in a curated knowledge base.
- Designed stateful AI agent workflows with Cloudflare Durable Objects for persistent multi-turn sessions — enabling iterative diagram refinement without context loss.

Navasana Frontend · navasana.ai

2026

React.js, TailwindCSS, JavaScript · client project, wellness SaaS

- Delivered the complete responsive frontend for a live SaaS product, achieving Lighthouse performance scores above 90 via memoization and code splitting.
- Built a reusable component library that reduced per-feature development time by ~30% across the product.

XpertSpot Official Website · xpertspot.com

2025 – Present

React.js, JavaScript, TailwindCSS

- Designed and built the company's public-facing website from scratch with fully responsive layouts; modular components cut future page build time by 40%.

E-Tailor Admin Platform · e-tailor-admin.vercel.app

2025

React.js, TailwindCSS, REST APIs

- Architected the frontend for a tailoring management SaaS, integrating 10+ REST API endpoints and building paginated data tables handling 1,000+ customer records.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL

Frameworks: React.js, Next.js, Node.js, Express.js

Styling & UI: TailwindCSS, Bootstrap, Material UI (MUI), Responsive Design

State & APIs: REST APIs, Context API, React Query, Next.js App Router, Server Components

Tools: Git, GitHub, Vercel, Cloudflare Workers, CI/CD, Edge Functions

Databases: PostgreSQL, SQLite, NeonDB, Supabase, Prisma ORM

AI & Cloud: Upstash Vector (RAG), Cloudflare Agents SDK, Durable Objects, AI SDK

EDUCATION

B.S. in Software Engineering · Khawaja Fareed University of Engineering and IT, Rahim Yar Khan

2023 – 2027 (Ongoing)
